

VENKATA VENU CHANDU

Senior Frontend Developer | MERN Stack Developer

Hyderabad, Telangana, India | venkatavenuchandu@gmail.com | [+91 6305783135](tel:+916305783135) | linkedin.com/in/venkata-venu-chandu-dev | github.com/chanduvenkatavenu123 | venuchandudev.lovable.app

PROFESSIONAL SUMMARY

Senior Frontend Developer with 2+ years of experience (fast-tracked from Intern to Senior) building scalable web applications in React.js, Next.js, and the MERN stack. Proven track record shipping SEO-optimized platforms, integrating third-party systems (Zoho CRM/Cliq, Firebase), and owning CI/CD deployments end-to-end via EasyPanel across property-management, ERP, and retirement-planning products. Actively seeking Senior Frontend Developer or MERN Stack Developer roles across Product, FinTech, and Service-based engineering teams.

TECHNICAL SKILLS

Frontend Architecture: Next.js (App Router, Server Components), React.js, JavaScript (ES6+), Redux Toolkit, TanStack Query, HTML5, Tailwind CSS

Backend, Cloud & Database: Node.js, Express.js, MongoDB, Firebase (Authentication, Cloud Messaging), RESTful API Design

DevOps & Infrastructure: CI/CD Pipelines, EasyPanel Deployments, Git/GitHub

Integrations & Tools: Zoho CRM & Cliq APIs, Server-Sent Events (SSE), Role-Based Access Control (RBAC), PDF/Excel Report Generation

PROFESSIONAL EXPERIENCE

Senior Frontend Developer | SkyGoal Inc. | Hyderabad, India

Sep 2024 – Present

- Architected the company's careers website using Next.js App Router and Server Components, boosting page load speed by 35% and improving organic search visibility through server-side rendering.
- Integrated Zoho CRM and Zoho Cliq APIs into the careers website's enquiry form, automatically logging every client lead in Zoho CRM and triggering real-time Zoho Cliq channel notifications to the management team, eliminating an estimated 90% of manual lead-tracking effort.
- Spearheaded full-stack feature delivery across 3 production platforms spanning property-management, ERP, and retirement-planning domains, building scalable interfaces in React.js alongside backend services in Node.js, Express.js, and MongoDB.
- Owned CI/CD deployment pipelines via EasyPanel for 5+ production applications — pushing from GitHub commit to live deploy independently — cutting deployment overhead by 40% and removing reliance on manual DevOps intervention for releases.
- Mentored 2 junior developers and established structured code review workflows, improving code quality standards and lifting team development velocity by an estimated 20%.

Frontend Developer Intern | SkyGoal Inc. | Hyderabad, India

Mar 2024 – Aug 2024

- Rapidly ramped up on the React ecosystem within weeks, delivering 10 reusable UI components in HTML5, CSS3, and JavaScript that were later adopted into the main production codebase.
- Collaborated with senior engineers on backend API integration, resolving 25+ front-end bugs and improving cross-browser consistency across Chrome, Safari, and Firefox.
- Converted Figma designs into pixel-perfect, responsive layouts for 5 client-facing pages, contributing directly to on-time delivery of client releases.

KEY PROJECTS

Trakart Services — Property Inspection Management Platform (Admin Dashboard)

[React.js](#) • [Tailwind CSS](#) • [JavaScript](#) • [REST APIs](#) • [Firebase Cloud Messaging \(FCM\)](#) • [Server-Sent Events \(SSE\)](#)

- Led frontend development of a full-featured admin dashboard managing clients, inspectors, inspection requests, rooms, issues, and reports for a property-inspection SaaS platform, translating Figma designs into production-ready, responsive UI.

- Implemented real-time notifications using Firebase Cloud Messaging (FCM) and Server-Sent Events (SSE), cutting inspection status update latency to near-instant and improving inspector response time by an estimated 30%.
- Integrated REST APIs across 6+ core modules, collaborating closely with backend engineers and designers to deliver a seamless, scalable inspection-management experience.

Lv Reddy Dairy Farm — Enterprise Resource Planning (ERP) Platform

React.js • Tailwind CSS • JavaScript • REST APIs • Role-Based Access Control (RBAC) • PDF/Excel Reports

- Led frontend development of a comprehensive ERP platform for dairy farm operations, building scalable interfaces spanning animal lifecycle management, inventory, vendor management, employee operations, and sales.
- Implemented Role-Based Access Control (RBAC) for sub-admins and employees, securing access across multiple user roles while maintaining a consistent, unified UI experience.
- Developed automated PDF and Excel reporting for operational data, cutting manual reporting time by an estimated 50% and enabling data-driven decisions for farm operations managers.

RetireHow & DollarFar — Retirement Planning Platforms

React.js • Tailwind CSS • Node.js • Express.js • MongoDB • REST APIs

- Developed and maintained end-to-end features across two consumer-facing retirement-planning platforms, building responsive UIs and backend services on the full MERN stack.
- Built secure form-submission workflows and RESTful APIs backed by MongoDB, powering lead-generation and user-data pipelines for both platforms.
- Engineered an admin dashboard for managing contact inquiries, user submissions, and website content, streamlining operations for the platforms' internal team.

EDUCATION

Bachelor of Technology (B.Tech), Civil Engineering

SRK Institute of Technology | Graduated 2023
